

## **Platform Software/Support Engineer**

Synergy Networking are a leading VoIP platform developer and software solutions vendor looking for an enthusiastic individual willing to learn new skills on their own as required.

The position would require working from home, so it is essential you can meet targets and work without intensive supervision. You will need to attend occasional meetings in the South East and some foreign travel may be required.

### Key Skills:

- PostgreSQL
- PHP5 (Not 4)
- General Linux administration (Gentoo / Debian)
- Javascript
- XPath
- XSLT
- Technical Documentation
- Ability to work within a team

### Desirable (but not required) Skills:

- C++
- Knowledge of SIP protocol

Previous industry experience would be desirable but highly motivated and skilled graduates are encouraged to apply.

£20-40k per annum depending on experience (PAYE or contract option available)

Applicants should send a CV in PDF, Plain Text, or HTML format to:
